

These are the steps you must go through to access RenWeb on your school device. RenWeb login has not been working properly on most school devices and so if you're having problems with getting in, this is most likely how you can.

Step one: Google search “renweb login”. After Googling this, click the first link [RenWebPortal](#). Upon opening the site, you will see a screen similar to this:

Our district code is “**bsa-ks**”. After typing in the district code, type your username and password which you received in an email. Then press log in.

After logging in, you may receive this screen:

⚠️ If you get this screen, just press the back button in the address line and remove -oidc. You may have to repeat this step once or twice.

After completing this step, you should arrive at this screen, and you have successfully logged into RenWeb, don't forget to bookmark at this point.
